INDEX

A

Abdominal operations, major, performance under pentothal and percaine 21
—— section, upper, position of patient in, during injection of spinal anæsthetic 146
Abstracts 30, 79, 167
Acapnia as cause of apnœa 122
Acetylene, when not to be used 92
Acidæmia, suggested cause of ether convulsions 50
Adams, R. C.: The present status of intravenous administration of pentothal (abstract) 167
Adrenalin, administration of chloroform before, dangerous 94, 95
Adrian, multiple systems of pain reception 11
Agranulocytosis, suggestion that evipan causes, apparently unfounded 65
Air-passages of patient, burning through ether explosion 92
Alkalæmia, suggested cause of ether convulsions 50
Amnesic-analgesic method in childbirth 104
Amputated limbs, causalgia of 13
Anæmia, cerebral, correction by placing patient in Trendelenburg position 97
—— no signs of, in cases under evipan sodium used in dental surgery 65
Anæsthesia, advances in (E. B. Tudhy: abstract) 79
—— "cocktail" method of 134
—— death under, causes of, multiplicity in 91
—— —— —— due to simple errors 91
—— fatalities under, failure in reduction of 85
—— induction of, death during 95
—— local, condition indistinguishable from ether convulsions in infant under 49
—— —— minor points in (P. D. Woodbridge: abstract) 129
—— —— with supplementary intravenous narcosis (P. Feldweg: abstract) 81
—— new sign in, chin retraction (J. U. Human) 66
—— practical, becoming practical but not exact science 90
—— third stage of, diagram representing 66, 67
—— —— —— planes of 67, 68
Anæsthetic, administration of, death during or from 88
—— —— certain types of cases doing best with certain types of 90, 91
—— agents, death caused by toxic effects of 95

Anæsthetic agents, impurities in, theory propounded to explain cause of ether convulsions 49
—— —— used in hospital, attempt at evaluation not satisfactory...90
—— analgesic method in childbirth 104
—— apparatus uniformity in (G. Edwards: correspondence) 77
—— —— (A. Charles King: correspondence) 131, 132
—— difficulties, prevention easy, cure difficult 95
—— methods and post-operative respiratory complications (Taylor, Bennett and Waters: abstract) 32
—— procedures in large general hospital (H. J. Shields: abstract)...127
Anæsthetics, census of number given each year over a number of years impossible 8
—— Department of, at Oxford University 166
—— direct concern in a death increase in numbers between 1923 and 1934 89
—— effects of, ideal conditions for observing 62
—— from hospital superintendent's point of view (A. J. Hugo: abstract) 80
—— greater safety of patients under older methods of giving 86
—— liquid, passing directly into pharynx of patients, fatalities from 91
—— self-administration in labour, not permissible 4
—— teachers of, difficulties confronting (editorial) 41
—— useful for analgesia 3
Anæsthetists, condition of work for, when employed in connection with operations on patients in paying wards of hospitals...71
—— emergency service of, in Paris 175
—— honorary, hospital attendance in dangerous cases 90
—— remuneration in private practice 71
—— responsibility of (F. W. Fullerton: correspondence) 175
Anal sphincter, dilatation of, powerful respiratory stimulus 97
Analgesia in labour (R. J. Minnitt: correspondence) 75
—— —— (C. Moir: correspondence) 34
—— —— —— duration under pure nitrous oxide and nitrous oxide and air compared 75, 76, 77
—— substances producing 1
—— and anæsthesia, effect of, in newborn infant (S. H. Clifford: abstract) 31
Anoxæmia 145
—— avoidance during nitrous oxide administration in labour 3
—— fatal, prevention of 146
—— in case of toxic jaundice following administration of pentothal 58
—— resulting from failure of oxygen during gas and oxygen anæsthesia 92
Anoxia 3
—— effect of, on action of nitrous oxide in human subject (J. H. Bennett and M. H. Slevers: abstract) 125
Apnœa, causes of 122
—— extreme, administration of carbon dioxide in cases of 122

Arteritis, pain from vaso-constriction in 17
Asphyxia as a consequence of nitrous oxide anæsthesia 4, 5
—— dangerous, nitrous oxide jactitations sign of approach of 43
—— foetal, danger of, under use of morphia or hyoscine in labour 107
Association of Anæsthetists of Great Britain and Ireland, annual general meeting (1937) 71
Association of Anæsthetists, attendance of representatives at Session of Consultants Group British Medical Association 72
—— —— —— —— election of officers and report of Council 70
—— —— —— ——(elections to honorary membership 72
Atropine idiosyncracy 52
Auricle, puncture needle devised for reaching 99
Avertin, administration of, deaths under 156
—— anæsthesia, tremor seen during recovery from 44
—— as adjuvant to nembutal not necessary 108
—— as basal narcotic in throat surgery 156
—— first administration of, in England 155
—— first distribution of supplies of, in London 155
—— fluid, consistency of 155
—— introduction of (G. Edwards) 154
—— narcosis, lightened by injection of coramine 156, 157
—— tedious preparation of, in early stages of use 154
—— use in labour 114

B

Babcock, case of removal of broken spinal needle 160
Baranger, J.: Relation of hyperpyrexia to anæsthesia (abstract) 32
Barbiturates, administration of, effects 1
—— intoxication by, symptoms of 58
—— intravenous, not desirable in childbirth 108
—— —— use in labour 114
Bartholomew and Colin: Improvements in the use of paraldehyde during labour (abstract) 169
Basal anæsthesia, rectal use of evipan in (A. E. Jones: abstract) ...170
Bennett, Taylor and Waters: Anæsthetic methods and post-operative respiratory complications (abstract) 32
Bennett, J. H., and M. H. Slevers: Effect of anoxia on the action of nitrous oxide in the human subject (abstract) 125
Betlach, C. J.: Morphine intravenously (abstract) 172
Binning, Rex: Analgesia in dentistry by means of "gas rain" (abstract) 170
Blomfield, J., and Sir F. E. Shipway: The use of avertin for anæsthesia 155, 156
Blood-count in case of toxic jaundice following administration of pentothal 57
—— pressure and respiratory volume with spinal anæsthesia (D. L. Lewis and E. G. M. Palser: abstract) 168
Bourginquon, time analyses of tactile impressions 11

Bourne, Wesley: Analgesia and anæsthesia in obstetrics: pentothal sodium, cyclopropane and vinyl ether 1
—— B. H. Raginsky, and S. Drovrkin: Changes in conditional responses, due to anæsthetics (abstract) 83
—— MacPhail and Gray: Pentothal sodium as hypnotic in obstetrics (abstract) 82
—— —— (and others): Use of pentothal sodium in early stages of labour 2, 4
Brain cell, origin of its oxygen 73
Braine, C. Carter (obituary) 39
Breathing, stoppage of, due to laryngeal spasm (correspondence) ...130
Brennan, H.: Concerning spinal analgesia, two pertinent cases and some criticism 147
—— Gas-oxygen and cerebral congestion (abstract) 126
British Medical Association, Consultants Group: Attendance at Session by representatives of Association of Anæsthetists 72
Broncho-pneumonia, septic, death from, following explosion of ether vapour in air passages 93
Bunyan, John: Evipan sodium in dental surgery 62
Burford, G. E., and O. R. Jones: Massive collapse of the lung after cyclopropane inhalation (abstract) 168
Burg's law, propositions laid down in 134

C

CÆSAREAN section, cyclopropane anæsthesia in 4
—— —— spinal analgesia in 117, 118, 135
Calcium gluconate, effect of injection in case of ether convulsions 49, 50, 51
—— —— intramuscular injection in case of toxic jaundice following administration of pentothal 56
—— —— intravenous administration in case of ether convulsions...26
Camphor and strychnine, intracardiac injections, attempted, in case of impending death on operation table 97
Carbon dioxide absorption method 7
—— —— —— —— unremitting attention required for 174
—— —— administration in cases of extreme apnœa 122
—— —— and oxygen, passage through endotracheal catheter 97, 98
—— —— —— —— proportion of carbon dioxide to be used 98
—— —— minimum amount to be mixed with ether 124
—— —— toxic effects of (R. M. Waters: abstract) 79
Cartwright, F.: Anæsthetic twitches 43
Causalgia of amputated limbs 13
—— pain of 11, 12
—— —— from vaso-dilation in 17
Cauterization, anæsthetics not to be used during 92
Cave, J. V.: The breaking of spinal needles 158
Cellulitis of the neck, administration of nitrous oxide contra-indicated in cases of 94

Central Midwives Board, nitrous oxide and air alone permitted by, to be given by midwives in labour cases 75
—— —— —— regulations for instruction in obstetric anæsthesia...71
Cerebellum, tumour of, operation for, death immediately after removal from table 87
Cerebral circulation, difficulty of restoring 100
—— congestion during anæsthesia by gas-oxygen (H. J. Brennan: abstract) 126
Cerebro-spinal fluid, factors affecting diffusion of percaine in.....152
——— — specific gravity of 120
—— —— —— —— nearest to that of light percaine fluid 150
—— —— —— —— question whether affected by menstrual fluid or any hæmorrhage 120
Chest complications following anæsthetic administration, late mortality from 90
Chin retraction, anæsthetics under the administration of which occurring 68
—— —— mechanism of 66, 67
—— —— —— explanation 67
—— —— new sign in anæsthesia (J. U. Human) 66
—— —— when more marked 68
—— —— when useful as a sign 68
Chloral, dose of, how best given 107
Chloroform, administration before adrenalin dangerous 94, 95
—— anæsthesia followed by toxic jaundice 55
—— and vinyl ether anæsthesia, effects on parturient women compared 6
—— dangers of, well known to coroners 95
—— ether drop-bottle accidentally filled with, fatal collapse of patient 91, 92
—— in ether bottle, danger of 91
—— induction of, death during 95
—— must be in appropriate container under use of Shipway apparatus 91
—— poisoning, recovery of liver from, not impeded by cyclopropane anæsthesia 3
—— substitution for ether in cases of ether clonus 44
—— use of, contra-indicated except in special instances 95
—— —— —— in addition to nembutal in childbirth, inadvisable 108
Clausen, R. J.: "As others see us" (correspondence) 174
Clifford, S. H.: Effect of analgesia and anæsthesia in newborn infant (abstract) 31
"Cocktail" method of anæsthesia 134
Colin and Bartholomew: Improvements in use of paraldehyde during labour (abstract) 169
Collapse, sudden, produced by novocaine group 21
Conditional responses, changes in, due to anæsthetics: S. Drovrkin, Wesley Bourne, and B. H. Raginsky (abstract) 83
Convulsions. *See* Ether convulsions.
Coramine, chemical elements of 99

Coramine, dosage of 99
—— injection in threatening cases under light percaine anæsthesia 147, 149
—— —— into left ventricle 99
—— —— —— —— kind of needle required for 99
—— —— lightening avertin narcosis 157
—— restoration of heart's action by 98, 99
Coroner's inquests in cases of death on the table 87
Coroners, dangers of chloroform well known to 95
—— date when becoming exacting as to investigation of deaths during administration of anæsthetics 89
Correspondence 34, 174
Courville: Asphyxia as a consequence of nitrous oxide anæsthesia (quoted) 4, 5
Cyclopropane 2
—— anæsthesia in Cæsarean section 4
—— —— in obstetrics 4
—— —— recommended in final stages of labour 7
—— —— recovery of liver from chloroform poisoning not impeded by 3
—— —— value of 3
—— erythema (V. J. Keating: abstract) 169
—— inhalation, followed by massive collapse of lung (O. R. Jones and G. E. Burford: abstract) 168
—— references 7, 8
—— self-administration dangerous 4
—— value tested experimentally 3
—— when not to be used 192

D

DEATH, impending, on operation table, measures formerly taken, contrasted with those of present day 96, 97
—— on operation table 86
—— —— —— (G. Edwards) 87
Dental surgery, evipan sodium in (J. Bunyan) 62
Dentistry, analgesia in, by means of "gas rain" (Rex Binning: abstract) 170
Dentures, artificial, dislodging of under anæsthetics 93
Desaturation, time taken to produce 74
Diathermy, anæsthetics not to be used during 92
Dilaudid-scopolamine before evipan anæsthesia (A. Riès: abstract) 31
Diploma in Anæsthetics, award to successful candidates 166
—— —— grants of 69
—— —— by examination to successful candidates 69
—— —— list of practitioners to whom granted 29
—— —— questions set for written part of examination 70
—— —— recipients of 116
Divinyl ether (abstract) 169
Dixon, C. P.: Some observations on pentothal sodium 60
Drovrkin, Wesley Bourne and B. H. Raginsky: Changes in conditional responses due to anæsthetics (abstract) 83

Drugs, combined, toxic effect increasing much more slowly than therapeutic effect 134

E

EARLE, K. V.: Evipan in the treatment of tetanus (abstract) 127
Ectopic gestation, operation for, under spinal analgesia 119, 137
Editorials 41, 85,
—— a word on synergy 133
Edwards, George: "Death on the table" 87
—— —— the introduction of avertin 154
—— —— notes of a case of breakage of spinal needles occurring at St. George's Hospital 161, 162
—— —— uniformity in apparatus (correspondence) 77
Elam, John: Ether convulsions (correspondence) 36
Electrical appliances in operating theatre must be kept in repair.....92
—— connections, potential source of sparks 92
Electrolytic conductor, pain as 12
England, first administration of avertin in 155
Enteritis, effect of novocain infiltrations of sympathetic on 10
Epigastrium, time taken for percaine solution to rise to level of, in spinal anæsthesia 23
Erlanger, waves of conduction of tactile, thermal and painful stimuli 11
—— and Gasser, action of sympathetic fibres 16
Erratum 40
Erythema. *See* Cyclopropane erythema.
Ether, administration in small amount followed by intramuscular injection of magnesium sulphate, example of synergy ...133, 134
—— anæsthesia, over-breathing during 50, 52
—— bottle, chloroform in, danger of 91
—— carbonized, administration by open method 122, 123, 124
—— —— —— —— operation for which suitable 123
—— —— —— —— with double mask 123
—— —— for anæsthesia (K. E. Madan) 122
—— —— use to be stopped if rate of breathing is increased 124
—— clonus, description of 44
—— —— kind of patients liable to 44
—— —— treatment of 44
—— convulsions 45
—— —— case of 102
—— —— —— —— treatment 102
—— —— case records 45–48
—— —— cause of death in 45
—— —— cause of, theories propounded to explain 49, 102
—— —— condition indistinguishable from, in infant under local anæsthesia 49
—— —— control of, by evipan 102, 103
—— —— effect of injection of calcium gluconate in case of ...49, 50, 51

Ether convulsions, extreme fatality of 45
—— —— occurring in case of operation for osteomyelitis of humerus (J. Elam: correspondence) 36
—— —— —— with patient in Trendelenburg position ...45, 46, 47, 48
—— —— reality of 102
—— —— spontaneous and sudden cessation of 46, 52
—— —— temperature during 48
—— —— treatment, general 52
—— —— —— of the cause 52
—— —— —— symptomatic 53
—— —— two cases of (R. W. P. Shackleton) 25
—— drop-bottle, accidentally filled with chloroform, fatal collapse of patient 91, 92
—— explosion causing burning of patient's air-passages 92
—— must be in appropriate container, in use of Shipway apparatus 91
Ether, small quantity permissible adjuvant in nembutal-chloral narcosis in childbirth 107
—— vapour and oxygen, insufflation with, for failure of pulse; explosion in patient's air passages; death from septic-broncho-pneumonia 92
—— when not to be used 92
—— *See also* Divinyl ether.
Etherington-Wilson, W.: Concerning spinal analgesia 135
—— —— time taken for percaine solution to descend to levels of pubes, umbilicus and epigastrium respectively 23
Etherington-Wilson technique for administration of spinal anæsthetics, advantages of 117, 135
—— —— —— —— disadvantages 142
—— —— —— —— presumed advantages discussed and criticised 150–152
—— —— —— —— three disturbing cases of spinal anæsthesia administered according to (C. W. H. Van der Post) 117
Ethyl chloride, when not to be used 92
—— ether and vinyl ether, employment of mixtures of in obstetrics 6
Ethylene, when not to be used 92
Evipan sodium anæsthesia, dilaudid-scopolamine before (A. Riès: abstract) 31
—— anæsthesia, tremor seen during 44
—— —— and pentothal sodium, administration of, for skin grafting of radical mastoid cavity, compared 60
—— —— in dental surgery (J. Bunyan) 62
—— —— —— —— advantages of 64
—— —— —— —— no signs of anæmia following 65
—— —— —— —— points with regard to the use of 62
—— —— in treatment of ether convulsions 53, 54
—— —— —— of tetanus (K. V. Earle: abstract) 127
—— rectal use of (A. E. Jones: abstract) 170
—— use of, in control of ether convulsions 103
Evipanometer, description and use of 63, 64

F

FAIRLIE, H. P.: Death of 71
Feldweg: Local anæsthesia with supplementary intravenous narcosis (abstract) 81
Fernandez, Mario: Observations on the viability of leucocytes following the administration of anæsthetics (abstract) 30
Foetus, dangers of use of morphia and hyoscine to, in twilight sleep 114
Foodstuffs, regurgitated, inhalation of, under anæsthetics 93
Foregger Company of New York, apparatus for administration of vinyl ether made by 7
French criticism of British methods in anæsthesia (correspondence) 174
—— laudation of British anæsthetic methods 174
Fullerton, F. W.: The anæsthetist's responsibility (correspondence) 175

G

GALL-BLADDER, operations on, administration of carbonized ether in 123
Ganglions, consistency of 16
Garry, Hilda: Report upon personal use of Chassar-Moir apparatus 76
Gas-and-oxygen machines, with by-pass taps to oxygen cylinders ...98
Gas-oxygen, cerebral congestion during anæsthesia by (J. H. Brennan: abstract) 126
"Gas rain," analgesia in dentistry by means of (Rex Binning: abstract) 170
Gelatin capsules, use of nembutal in 105
Goldschmidt and others: Experimental work on vinyl ether 5, 6
Gray, MacPhail and Bourne: Pentothal sodium as hypnotic in obstetrics (abstract) 82
Greaves, H. Gordon: Death of 71
Griffith (and others) cyclopropane anæsthesia in Cæsarean section....4

—— —— analgesia in labour (correspondence) 34
Molitor: Experimental work on vinyl ether 6
Morat: Extra-rachidian marrow 16
Morphia, avoidance at any stage of labour as adjuvant to nembutal-chloral narcosis 107
—— and hyoscine, danger to fœtus when used in "twilight sleep" 114
Morphine, administration of, effects 1
Morrin, F. J.: Experiences with avertin as a basal narcotic in throat surgery 156

N

Naked flame or open fire, anæsthetics not to be used in presence of 92
Naumann: First case of breaking of needle in spine reported by ...158

Neck, swelling of, administration of nitrous oxide contra-indicated in cases of 94
Needle, large-sized, required for injection of coramine 99
—— *See also* Puncture needle.
Needles. *See* Spinal needles.
Nembutal, absorption of, methods to assist 107
—— description of 105
—— dose of, to precede dose of chloral in nembutal-chloral narcosis 106
—— qualities of 105
—— use in gelatin capsules 105
—— —— in obstetrics disadvantageous 2, 9
—— chloral dosage in successive doses 106
—— —— dosage, total 106
—— —— narcosis in childbirth (F. B. Mallinson) 104
—— —— —— —— advantages of method 112, 115
—— —— —— —— clinical effects 108, 109
—— —— —— —— comparison with other methods 113, 114
—— —— —— —— contra-indications 113
—— —— —— —— illustrative cases 110
—— —— —— —— permissible and non-permissible adjuvants 107
—— —— —— —— physiological effects on mother and child 109, 110
—— —— —— —— results 110
Nembutal, chloral narcosis in childbirth, time of commencing 105
—— —— —— —— in primiparous and in multiparous patients 105, 106
Nephrectomy, use of carbonized ether in cases of 123
Nerve as an electrolytic conductor 12
—— interruption of, symptoms following 15
—— life of, connected with life of vegetative system 18
—— regeneration of, symptoms following 15
—— sensitive, not a physiological unity 18
—— touching or pricking, causing violent sensation of pain 15
Neuralgia, facial, pain of 13
Nitrogen, elimination of, factor determining rate of 74
Nitrous oxide, administration in cases of swelling of neck contra-indicated 94
—— —— intermittently during labour 3
—— —— anæsthesia, asphyxia as a consequence of 4, 5
—— —— —— deepening produced by the McKesson technique 74
—— —— and air, alone permitted to be given in labour by midwives 75
—— —— —— —— analgesia in labour 114
—— —— and oxygen, administration for intermittent analgesia in severe pains of labour recommended 7
—— —— —— —— as adjuvant in nembutal-chloral narcosis in childbirth 107
—— —— —— —— use in labour, advantage and disadvantage of 114
—— —— average of volumes per cent found to produce anæsthesia in man and dog respectively 73
—— —— effect of anoxia on action of in human subject (J. H. Bennett and M. H. Slavers: abstract) 125

Nitrous oxide, jactitations 43
—— —— -oxygen-air analgesia (continuous) in obstetrics (R. C. Sword: abstract) 81
—— —— pure, administration in labour 34, 35
—— —— —— and nitrous oxide and air, respective duration of analgesia in labour under, compared 75, 76, 77
—— —— saturation with, time taken to produce 74
—— —— self-administration dangerous 4
—— —— value as an analgesic 3
Novocain, experimental injection, results 144
—— group, anæsthetics of, sudden collapse produced by 21
—— infiltrations of sympathetic, effect on enteritis 16
—— —— —— —— effects of 16
Nuffield, Lord: Presentation to, by International Anæsthetic Research Society and International College of Anæsthetics 28
—— —— elected honorary member of Association of Anæsthetists...72

O

Obituary: Braine, C. Carter 39
—— Lewis, Ivor Nicholas 84
Obstetric anæsthesia, instruction in, regulations for 71
—— narcosis, main criteria in, technique of 104, 105
Obstetrics, analgesia and anæsthesia in (W. Bourne) 1
—— —— references 7, 8
—— continuous nitrous oxide-oxygen-air analgesia in (R. C. Sword: abstract) 81
—— cyclopropane anæsthesia in 4
—— employment of mixtures of vinyl ether and ethyl ether in 6
—— pentothal sodium as hypnotic in (MacPhail, Gray and Bourne: abstract) 82
—— relief of pain in 1
—— use of nembutal in, disadvantageous 2
Oglobina, failure of symptoms to occur after breaking of spinal needle 159
Oligopnœa, fœtal, due to addition of morphia to nembutal 107, 108
Omnopon, administration of, preceding that of avertin in first two cases 155
—— and scopolamine, administration of, before intravenous and spinal anæsthesia, using pentothal and percaine 122
—— —— —— —— with percaine, percentage of headaches following 21
Operating table, deaths on 86
—— —— —— —— (G. Edwards) 87
—— theatre, electrical appliances in, must be kept in repair 92
Operation, death under anæsthetics caused by effects of 95
Operations, condition of patients after 85, 86
—— untoward events occurring during 95
Organe, Geoffrey: Secondary saturation (correspondence) 173
Osborne, G. R.: Post-anæsthetic pulmonary complications (abstract) 125

Over-breathing during ether anæsthesia 50, 52
Oxford, University of, Department of Anæsthetics at 166
Oxygen, administration of, in cases of impending death on operating table 96, 97
—— anæsthetic twitch due to want of supply of 43, 44
—— blast of, resulting in rupture of stomach, followed by fatal general peritonitis 93
—— of brain cell, origin of 73
—— supply, failure of, during gas and oxygen anæsthesia, result 92, 93
—— in apparatus for administering vinyl ether 7
—— and carbon dioxide, passage through endotracheal catheter 97, 98

P

Pain and experimental stimulation, compared 13
—— as a fact of sensation 11
—— bundle 10
—— due to interference by vital phenomena in system of peripheral innervation 17
—— essential feature of 12
—— experimental, and pain of illness, difference between 18
—— —— —— —— identity doubtful 11
—— observed by clinicians deserves study by physiologists 13
—— of causalgia 11, 12
—— of facial neuralgia 13
—— of illness, abnormality of 18, 19
—— —— —— inadequacy of conception of 10
—— —— —— nature of 12
—— —— —— origin outside of receptor system 14
—— of sympathetic origin 16
—— physical, nature of enquiry into (R. Leriche) 9
—— —— real nature of 17
—— physiological study of, wrong starting-point for 10
—— place of, only in order of reflex cycles 18
—— protective sense of 10
—— receptors, estimation of, problem exaggerated 10
—— —— specific 11
—— relief of, in obstetrics 1
—— sensation of, in skin-scars and skin-grafts 15
—— set up by vaso-motor disturbance 17
—— threshold of, how determined 27
—— violent sensation of, from touching or pricking a nerve 15
Painful phenomena of unknown ætiology, vaso-constriction factor in...16
Palser, E. G. M., and D. L. Lewis: Blood-pressure and respiratory volume with spinal anæsthesia (abstract) 168
Paraldehyde, administration of, effects 1
—— as an adjuvant to nembutal in childbirth not necessary.....108
—— during labour, improvements in (Colin and Bartholomew: abstract) 169

Paris, emergency service of anæsthetists in 175
Parturient women, effects on, of chloroform anæsthesia and vinyl ether anæsthesia compared 6
Pathological Society of Great Britain and Ireland. *See* Medical Research Council.
Patients, attention to complaints of, desirable 9, 10
—— condition of, after operation 85, 86
—— greater safety of, under older methods of giving anæsthetics ...86
Paying wards of hospitals, conditions of work for anæsthetists when employed in connection with operations on patients in ...71
Pentothal sodium 2
—— —— administration, causing irritation to subcutaneous tissues 61
—— —— cutting of Tiersch graft under 60, 61
—— —— followed by toxic jaundice 55
—— —— —— references 58
—— —— greater degree of anæsthesia given by, than by evipan ...61
—— —— —— in early stages of labour recommended 7
—— —— and evipan sodium, administration of, for skin grafting of radical mastoid cavity, compared 60
—— —— as hypnotic in obstetrics (MacPhail, Gray and Bourne: abstract) 82
—— —— and percaine, administration of, disappearance of headaches under 21
—— —— —— —— operations for which employed 21
—— —— —— —— use of, in combination of intravenous with spinal anæsthesia (R. Jarman) 20
—— intravenous administration of, present status of (R. C. Adams: abstract) 167
—— observations on (C. P. Dixon) 60
—— references 7, 8
—— use of in early stages of labour 2
—— why unsuitable in cases of liver damage 58
Percaine, administration with omnopon and scopolamine, percentage of headaches following 21
—— anæsthesia, reduction of psychic shock in 24
—— diffusion of 120, 140
—— —— in cerebro-spinal fluid, factors affecting 152
—— experimental injection, result 144
—— light, specific gravity of, nearest to that of cerebro-spinal fluid 150
—— method of injection into spinal canal, important in spinal anæsthesia 23
—— rate of ascent of 120
—— —— —— —— factors influencing 140
—— safety factor of 117, 135
—— solution, time taken to rise to levels of pubes, umbilicus, and epigastrium respectively 23
—— and pentothal, administration of, disappearance of headaches following 21

Percaine and pentothal, use of, in combination of intravenous with spinal anæsthesia (R. Jarman) 20
Peritonitis, general, fatal, following rupture of stomach from blast of oxygen 93
Pharynx, liquid anæsthetics passing directly into, result 91
Phenobarbital (luminal) repeated doses by the mouth followed by toxic jaundice 55
Physiological phenomena related to ânæsthesia (C. F. Schmidt: abstract) 128
Physiologists, idea of, regarding pain 10
Piéron, rate of travel of tactile impressions 11
Posterior root anæsthesia 150
Pratt (and others): Advantages of use of pentothal sodium 2
Preissecker, absorption of anæsthetic fluid by spinal roots 120, 135
—— on sitting up of patients in lumbar anæsthesia 119, 120
Premedication, question of, in spinal analgesia 138, 139
Protective sense of pain 10
Psychic shock, reduction in percaine anæsthesia 24
Pubes, time taken for percaine solution to rise to level of, in spinal anæsthesia 23
Pulmonary complications, post-anæsthetic (G. R. Osborne: abstract) 125
Puncture needle devised for reaching auricle 99

Q

Quincke: First lumbar-puncture reported as having been done by (1889) 158
Quinsy, administration of nitrous oxide contra-indicated in cases of 94

R

Radiography, anæsthetics not to be used during 92
Raginsky, B. H., S. Drovrkin, and Wesley Bourne: Changes in conditional responses, due to anæsthetics (abstract) 83
Receptor system, origin of pain of illness outside of 14
Receptors, specific, not present in scars or grafts 15
Reflex cycles, place of pain only in order of 18
Registrar-General: Returns for England and Wales, number of cases recorded (since 1923) in which anæsthetic is directly concerned in a death 89
Respiration, artificial, in cases of impending death on operation table 97
—— disturbance of, produced by high injection of spinal anæsthetic 20
—— paralysis of, in spinal analgesia 143, 144, 145
Respiratory centre, depression of 145
—— complications (post-operative) and anæsthetic methods (Taylor, Bennett and Waters: abstract) 32
—— volume and blood-pressure with spinal anæsthesia (D. G. Lewis and E. G. M. Palser: abstract) 168
Retro-pharyngeal abscess, administration of nitrous oxide contra-indicated in cases of 94

Review: The technique of local anæsthesia (1937), by A. E. Hertzler 38
Riès, A.: Dilaudid-scopolamine before evipan anæsthesia (abstract) 31

S

St. George's Hospital, case of breakage of spinal needles occurring at 161, 162
—— —— —— first administration of avertin in England at 155
—— —— —— number of deaths on the table at (1923-27) (1933-37) 89
—— —— —— number of operations conducted in the theatres at (1923–27) (1933–37) 89
—— —— —— operations for strangulated herniæ, decline in numbers 90
Sarnoff, cases of breaking of spinal needles, with removal of needles before onset of symptoms 160, 161
Scars, sensation of pain in 15
—— specific receptors not present in 15
Schmidt, C. F.: Physiological phenomena related to anæsthesia (abstract) 128
Scopolamine, administration of, effects 1
—— result of use of, in addition to nembutal 107
—— *See also* Omnopon and scopolamine.
Sebrecht: Result of injection of percaine (quoted) 144

Shock, present or expected, administration of carbonized ether in cases of operation with 123
Sickness-pain. *See* Pain of illness.
Skin grafting of radical mastoid cavity, operation for, under pentothal sodium and evipan, compared 60, 61
—— grafts, specific receptors not present in 15
—— —— sensation of pain in 15
Sparks, potential source of 92
Spinal anæsthesia, advantages of 21
—— —— blood-pressure and respiratory volume with (D. L. Lewis and E. G. M. Palser: abstract) 168
—— —— Etherington-Wilson technique, three disturbing cases, administered according to (C. W. H. Van der Post) 117, 135
—— —— prone position in, advantages of 150

Spinal anæsthesia, safety-factor of 151
—— —— sitting-up of patients in 119, 120
—— —— Trendelenburg position in 146
—— anæsthetic, injection, high, producing respiratory disturbances...20
—— —— —— —— of, in state of unconsciousness preferable 20, 21
—— —— patient unsuitable for 146
—— anæsthetics, administration of, drawbacks to 21
—— —— —— —— in lying-down and sitting position discussed.....142, 143
—— —— use of heavy solutions recommended 143, 145
—— analgesia (H. Brennan) 147
—— —— (W. Etherington-Wilson) 135
—— —— (E. Falkner Hill) 142
—— —— higher induction in, when not advisable 139
—— —— necessity of team-work and apparatus in 141
—— —— question of safety of 136
—— —— safety factor of 119, 135
—— —— vertical position in, advantages 136, 137
—— column, diffusion rate of anæsthetic solution in 120
—— cord, condition of interior of 152
—— glass canals, recommendation of performance of mock analgesia in 136
—— needle, insertion into thecal canal at right angles important 22, 23
—— —— removed by laparotomy 160
—— needles, breaking of (J. N. Cave) 158
—— —— —— —— cases reported in literature 158–161
—— —— —— —— failure of symptoms to occur after 159
—— —— —— —— from corrosion 163
—— —— —— —— (references) 165
—— —— —— removal of needles before onset of symptoms...160, 161
—— —— broken, removal of 160, 161
—— roots, absorption of anæsthetic fluid by 135
—— and intravenous anæsthesia, combination of, using pentothal and percaine (R. Jarman) 20
Spinocaine, administration in sitting position 137
Status lymphaticus 101
—— —— cited without evidence as leading to anæsthetic fatalities...101
—— —— denial of existence of 101
—— —— post-mortem evidence pointing to existence of 101
Stevens, M. H., and J. H. Bennett: Effect of anoxia on the action of nitrous oxide in the human subject (abstract) 125
Stimulation, experimental, and pain, comparison of 13
Stomach, rupture of, from blast of oxygen, resulting in fatal general peritonitis 93
Subcutaneous tissues, irritation to caused by pentothal sodium administration 61
Sunstroke, post-mortem appearances of 51
